### DETAILED ACTION

1. This office action is in response to the Amendment and Remarks filed 22 January 2006, in which claims 1-9 and 18-22 were presented for examination.

#### ***Allowable Subject Matter***

2. **Claims 1-9 and 18-22** are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or fairly suggest the claimed methods for scheduling a fuel split for a gas turbine as claimed in its entirety, comprising: converting the exhaust temperature error to a projected NOx leveling fuel split adjustment for the entire combustor, adjusting the reference fuel split for the entire combustor and applying the adjusted fuel split determine fuel flow to the entire combustor.

The prior art of record does not teach or fairly suggest the claimed methods for scheduling a fuel split for a gas turbine as claimed in its entirety, comprising: a conversion of an exhaust temperature error to a projected NOx leveling adjustment further comprising determining a projected NOx level from the exhaust temperature error; determining an adjuster Q factor as a ratio of a NOx level baseline request and the projected NOx level, and applying the adjusted Q factor to determine the projected NOx level adjustment.

The prior art of record does not teach or fairly suggest the claimed methods for scheduling a fuel split for a gas turbine as claimed in its entirety, further comprising a reference fuel split schedule is determined for a base load condition at which the gas turbine is operating at full rated power.

Art Unit: 3661

The prior art of record teaches a system and method for controlling a gas turbine having multiple combustion chambers, automatically controlling the scheduling of a fuel split in each individual combustion chamber to optimize their individual performance by determining a target exhaust temperature corresponding to a desired NOx reference fuel split, determining an exhaust temperature error, adjusting the reference fuel split, and applying the adjusted fuel split.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
